

MarineGuard AI — Investigation Report

SYNTHETIC DEMONSTRATION DATA — not real-world observations.

1. Incident information

Field	Value
Incident ID	TEST-001
Title	Test Incident
Location	
Observation time	
Provenance	SYNTHETIC DEMONSTRATION DATA

2. Satellite observation

SAR scene associated with this incident. Detection mode: **n/a**.

3. Spill detection

Field	Value
Mode	
Confidence	0.0%
Status	

4. Spill geometry

Field	Value
Area	n/a km ²
Length	n/a km
Width	n/a km
Perimeter	n/a km
Centroid	None, None
Shape	

5. Probable origin

Field	Value
Latitude	None
Longitude	None
Estimated origin time	None
Window	None → None
Uncertainty radius	None km

6. Hindcast result

Backward trajectory points: 0. Model: None.

7. Forecast

Lead time	Latitude	Longitude
-----------	----------	-----------

8. AIS traffic analysis

Field	Value
Total vessels	None
Spatial candidates	None
Temporal candidates	None
Final candidates	None

9. Candidate vessel ranking

Rank	MMSI	Score	Priority
------	------	-------	----------

10. Evidence

11. Confidence

Detection confidence 0.0%. Drift uncertainty radius None km. Forecast corridor width None km.

12. Data gaps

- Satellite detection may include false positives, especially in prototype/demo mode.
- AIS coverage may be gapped, delayed, or spoofed.
- Ocean wind/current fields are sparse demonstration vectors, not a circulation model.

13. Responsible-AI disclaimer

This system prioritises vessels for investigation and does not establish definitive legal responsibility. The highest-ranked vessel is a highest-priority candidate only. Results require human validation and must not be used as the sole basis for legal enforcement.
